Eight State University System Teams Awarded \$500,000 in research grants

THINK TALENT...As part of the 2016 Florida Center for Cybersecurity Seed Grant Program, eight research teams led by State University System faculty members -- from FAMU, FAU, FIU, FSU, UCF, UF, UNF, and USF -- have each been awarded one-year seed grants.

THINK PARTNERSHIPS...The Florida Center for Cybersecurity, housed at USF, is investing in ideas and promoting collaboration among cybersecurity faculty across the state.

THINK RESEARCH...The teams focused their research on topics important to national security, including protecting the power grid from a cyber-attack and preventing cyber-induced attacks. Also, many of the projects will grow to support research and attract companies, expanding the cybersecurity workforce in Florida.

THINK FLORIDA...A Higher Degree for Business.

Think Florida: A Higher Degree for Business is a unified State University System campaign designed to build synergies between Florida's 12 public universities and the business community. The campaign's primary focuses are talent, research and partnerships.
