Introduction

The State University System (SUS) of Florida is committed to excellence in teaching, research and public service – the traditional mission of universities. This is achieved through a coordinated system of institutions, each having a distinct mission and each dedicated to meeting the needs of a diverse state and nation. This past year, the System has experienced myriad accomplishments and has identified a number of opportunities for improvement:

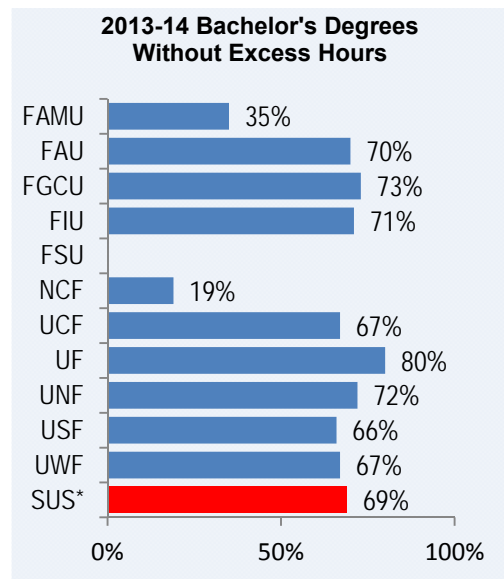

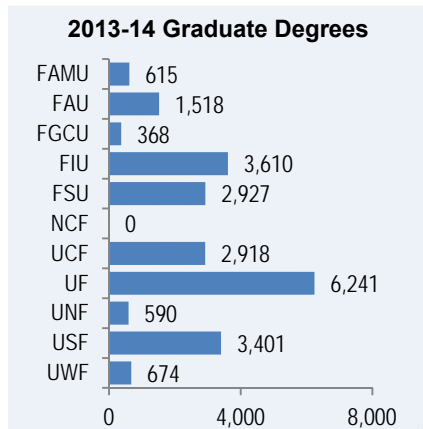

- The System has developed a Performance-Based Funding Model that will drive universities toward achieving Florida's top priorities and reward both excellence and improvement on key metrics, especially in areas of student success (see pages 7-8 of this System report). The model is noted for its transparency, its clarity, and its sensitivity to the unique missions associated with SUS institutions.
- In November 2014 the Board of Governors approved an alignment of its 2025 System Strategic Plan, adding relevant metrics and goals, and adjusting certain existing goals on key performance indicators to more accurately reflect the progress being made on the goals associated with those indicators.
- The State University System of Florida six-year graduation rate is ranked 2nd compared to the ten largest states (for public four-year universities). The Board of Governors has prioritized improving the graduation rates of all universities, especially those that still fall below the System goal of 70%.
- STEM (science, technology, engineering, and mathematics) degree production increased more than non-STEM degree production during the past four years for both baccalaureate degrees and graduate degrees. At the baccalaureate level, STEM degrees have grown 37% in the last five years, outpacing the 14% growth in non-STEM disciplines. Graduate STEM degrees grew 27% compared to the 9% of non-STEM graduate degrees. With the creation of the newest institution in the SUS – Florida Polytechnic University – it is expected that STEM degree production will continue to grow at an even greater pace.
- The State University System is one of the most active public university engines for R&D in the country, expending \$1.78 Billion dollars in FY2012-13. Collectively, SUS institutions have had more utility patents awarded in the past five years than any other entity in Florida. The SUS has almost 550 institutes and centers conducting research with an average \$5.94 ROI for every state dollar invested, and the 11 Centers of Excellence have a collective ROI of \$6.67 for every state dollar invested (see pages 21-22 for more information).
- Florida ranked 2nd in the total number of students who took at least one Distance Learning course. In 2013-14, 12% of all the courses sections taught in the System were offered via Distance Learning, and 54% of all students took at least one Distance Learning course (9% of students were only enrolled in Distance Learning courses). In terms of the overall instructional effort (measured in student credit hours), 20% of all activity occurred via Distance Learning (see pages 10-12 of this System report).
- Universities terminated 23 degree programs during the 2013-14 academic year. In addition, many other new programs that were identified on the University Work Plans as being considered for implementation in AY2013-14 were not implemented as a result of a robust and ongoing review process by the Council of Academic Vice Presidents.

RESEARCH AND COMMERCIALIZATION ACTIVITY

RESOURCES

Note: Tuition and Fee revenues include tuition, tuition differential fee and E&G fees (i.e., application, late registration, and library fees/fines) based on the actual amount collected (not budget authority) by universities as reported in their Operating Budget 625 reports. Other local fees that do not support E&G activities are not included here. Please note that a portion of the Tuition & Fees is supported by federal SFA programs (ie, Pell grants). State-funded Student Financial Aid amounts include the 11 SFA programs that OSFA reports annually. State Appropriations includes General Revenues, Lottery and Other Trust funds (i.e., Federal Stimulus for 2009-10 and 2010-11 only) that are directly appropriated to the university as reported in Final Amendment Package.

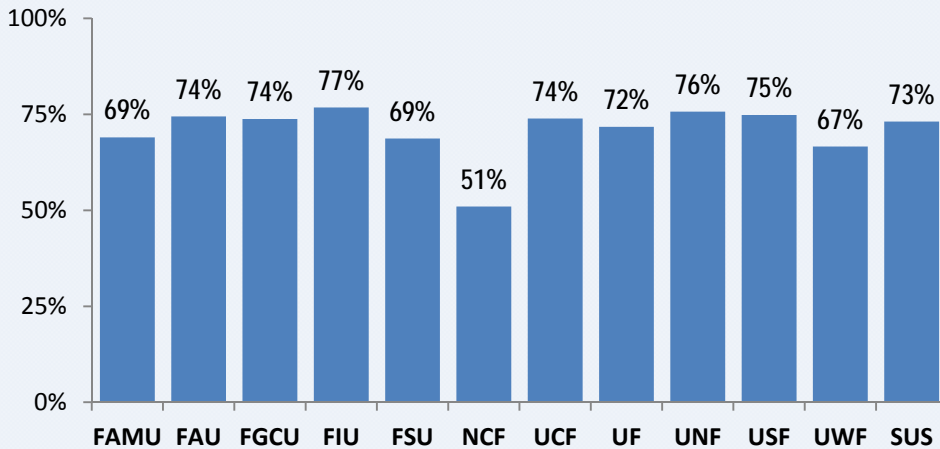

Note: Student FTE are actual and based on the standard IPEDS definition of FTE (equal to 30 credit hours for undergraduates and 24 for graduates). This data does not include funds or FTE from special units (i.e., IFAS, Health-Science Centers or Medical Schools). Not adjusted for inflation.

POST-GRADUATION METRICS

Percent of 2012-13 Bachelor's Graduates Employed or Continuing their Education, One Year After Graduation

Notes: Percentages are based on the number of recent baccalaureate graduates who are either employed full-time or continuing their education in the U.S. (based on the National Student Clearinghouse data). Full-time employment is based on those who earned more than a full-time (40hrs a week) worker making minimum wage. Due to limitations in the data, the continuing enrollment data includes any enrollment the following year regardless of whether the enrollment was post-baccalaureate or not. **It is important to note that BOG staff 'found' 90% of the total graduating class for 2012-13.**

Median Wages of 2012-13 Bachelor's Graduates Employed Full-time in Florida, One Year After Graduation

Notes: Wage data is based on Florida's annualized Unemployment Insurance (UI) wage data for those graduates who earned more than a full-time employee making minimum wage in the fiscal quarter a full year after graduation. This UI wage data does not include individuals who are self-employed, employed out of state, employed by the military or federal government, or those without a valid social security number. These data account for 49% of the total 2012-13 graduating class. This wage data includes graduates who were employed full-time (regardless of their continuing enrollment). Wages rounded to nearest hundreds.

Performance Based Funding Metrics

The Performance Based Funding (PBF) Model includes 10 metrics that evaluate the institutions on a range of issues. Two of the 10 metrics are institution-specific metrics: one is chosen by the Board of Governors and one by each university Board of Trustees. These Performance Based Funding data are **preliminary** – data for PBF is locked on March 1st.

ENROLLMENT

With 337,750 students enrolled during the Fall 2013 semester, the State University System of Florida had the second-largest enrollment among public four-year institutions, behind the California State University System. During the last ten years, the State University System's Fall headcount enrollment has grown by more than 66,000 students – representing 24% growth. If the entire academic year is considered, instead of just the traditional view of Fall-only enrollment, there were 399,667 students enrolled in the System during 2013-14.

Another important dimension to enrollment is the amount of credit hours that students earn. Full-time Equivalent (FTE) enrollment is a measure of student instructional activity that essentially translates the number of credit hours earned into an equivalent count of full-time students.

Note: These data are based on Florida's definition of full-time, which divides undergraduate credit hours by 40 and graduate credit hours by 32. Student credit hours for which the University receives funding by the state are called State Fundable Student Credit Hours (SFSCH). Not all credit hours are fundable (i.e., credits that are awarded by exam, or for students repeating a course, or for auditing a course). The two largest, and fastest growing, components of non-fundable credits are: 'Funded from Non-University Sources' where a sponsoring agency pays all direct costs, and 'Student Funded' where students pay all of the costs of student instruction (combined, these two components comprised 66% of all non-fundable credit hours in in 2013-14). This data does not include medical (Grad III) credit hours.

DISTANCE LEARNING

The following tables provide several different views of Distance Learning education within the State University System. In 2013-14, 12% of all the course sections taught in the System were offered via Distance Learning, and 54% of all students took at least one Distance Learning course (9% of students were enrolled only in Distance Learning courses). In terms of the overall instructional effort (measured in student credit hours), 20% of all activity occurred via Distance Learning. In comparison with other states, Florida ranked 2nd in the total number of students who took at least one Distance Learning course.

Source: Board of Governors staff analysis of US Dept. of Education's National Center for Education Statistics (NCES) available at the Integrated Postsecondary Education Data System (IPEDS) website (data extracted 12/12/2014). Notes: The IPEDS Distance Learning data has a few differences with Distance Learning data that is reported in Florida: (1) IPEDS defines Distance Learning as instructional content that is delivered exclusively (100%) via distance education – Florida statute defines Distance Learning as at least 80%; (2) IPEDS data is based on beginning –of-term preliminary Fall term enrollments; whereas, the previous tables were based on end-of-term final enrollment in academic years - which provides students more opportunity to take courses in multiple modalities. These are two reasons why the percentage of headcounts enrolled in Distance Learning are higher in the preceding System tables than in the national data.

Note: Full-time Equivalent (FTE) student is a measure of instructional effort (and student activity) that is based on the number of credit hours that students enroll. FTE is based on the Florida definition, which divides undergraduate credit hours by 40 and graduate credit hours by 32. Distance Learning is a course in which at least 80 percent of the direct instruction of the course is delivered using some form of technology, when the student and instructor are separated by time or space, or both (per 1009.24(17), F.S.).

2014 Initiatives Related to Distance Learning

The Board of Governors established the Innovation and Online Committee as one of its standing committees and indicated that its activities should include, but not be limited to, investigating policies and best practices for transformative and innovative approaches to the delivery of higher education.

The Task Force on Postsecondary Online Education in Florida presented to the Committee its report and recommendations concerning ways in which services and online degree programs could be better coordinated to ensure that state and student needs are being met in a cost-efficient and effective manner. The Committee is moving forward with implementing recommendations in the report.

The Committee directed the creation of a system-wide task force to draft a Strategic Plan for Online Education for its consideration. The plan should be completed in 2015.

The 2014 Legislature created the Complete Florida Plus Program at the University of West Florida, transferring the responsibilities and funding of the Florida Virtual Campus and the Complete Florida Degree Initiative to the newly created program.

In an effort to maintain access, the Board of Governors' 2025 System Strategic Plan calls for all institutions to have at least 30% of Fall undergraduates receiving a Pell Grant. The Board has also included this metric in its Performance Based Funding Model.

Notes: 'Eligible Dependents' refers to those who meet specific criteria as described by the Department of Veterans Affairs. The Post-9/11GI Bill includes a transferability option that allows Servicemembers to transfer all or some unused benefits to their spouse or dependent children. The Department of Defense (DoD) determines whether or not you can transfer benefits to your family. Once the DoD approves benefits for transfer, the new beneficiaries apply for them at VA. Survivor's and Dependents' Educational Assistance (DEA) program that provides education and training opportunities to eligible dependents of certain veterans. To be eligible, you must be the son, daughter, or spouse of: (1) A veteran who died or is permanently and totally disabled as the result of a service-connected disability. The disability must arise out of active service in the Armed Forces. (2) A veteran who died from any cause while such service-connected disability was in existence. (3) A servicemember missing in action or captured in line of duty by a hostile force. (4) A servicemember forcibly detained or interned in line of duty by a foreign government or power.

PROGRAMS OF STRATEGIC EMPHASIS

To promote the alignment of the State University System degree program offerings and the economic development and workforce needs of the State, the Board of Governors maintains a list of Programs of Strategic Emphasis that are classified into the following categories: Science, Technology, Engineering, and Mathematics (123 disciplines), Health Professions (50 disciplines), Global Competitiveness (24 disciplines), Education (37 disciplines), and Gap Analysis (10 disciplines). For additional details about the programs, please visit the Board's website at: http://www.flbog.edu/pressroom/strategic_emphasis/. The categories associated with the programs of strategic emphasis were updated by the Board during its November 2013 meeting.

The Board of Governors' 2025 System Strategic Plan calls for 50% of Bachelor's degrees and 60% of Graduate degrees to be awarded within these Programs of Strategic Emphasis, and the Board included these two metrics within its Performance Based Funding Model.

Notes: The calculation for the percentage of degrees awarded within the Programs of Strategic Emphasis include first and second majors. Programs of Strategic Emphasis degree data for New College of Florida is provided by NCF staff because they do not use the standard taxonomy of disciplines that would allow Board of Governors staff to make these calculations. For more information about how this metric is calculated, see: http://www.flbog.edu/about/budget/docs/performance_funding/PBF_Strategic_Emphasis_Degrees_Methodology_2014-09-24.pdf.

■ UNDERGRADUATE RETENTION AND GRADUATION RATES

Research shows that the highest attrition rates occur in the first two years of college, so early identification is crucial in helping first-time-in-college (FTIC) students who are at risk academically. The percentage of students who have maintained a Grade Point Average of 2.0 or higher by the end of their first year and continue to their second Fall term serves as a good early indicator of graduation within four- and six-years.

The Board of Governors' 2025 System Strategic Plan calls for a 90% Academic Progress Rate System-wide, a 50% four-year FTIC graduation rate, and a 70% six-year graduation rate. The Board also included the Academic Progress Rate and the six-year FTIC graduation rate in the Performance Based Funding Model.

Notes: Institutional retention rates report retention at the same university, and the System is based on retention at the same institution – the retention rate anywhere in the System is 84%. The historical Academic Progress Rates have been revised since the 2012-13 Accountability Report to fix an error that impacted every institution's rates. Note1: 2013-14 data is preliminary until the data is submitted to the US Dept. Of Education in late February. Note: USF-SM began admitting FTICs in Fall 2013. For more information about how this data is calculated, see: http://www.flbog.edu/about/budget/docs/performance_funding/PBF_GRADUATION_and_RETENTION_Methodology_FINAL.pdf.

Note: Institutional graduation rates are based on graduation from the same university, and the System rate is based on graduation from the same university. Note*: the 2010-14 System FTIC rate for graduation from anywhere in the System is 42%, and the 2008-14 rate is 70%. Since degrees can be awarded after the last semester of coursework, the graduation rates ending in 2014 are preliminary data that may increase slightly with the addition of "late degrees" and cohort adjustments for specific, and rare, exemptions. Graduation rates are considered 'final' once they are reported to the US Dept. of Education (on the IPEDS Graduation Rate Survey) in late February. For more information about how this data is calculated, see: http://www.flbog.edu/about/budget/docs/performance_funding/PBF_GRADUATION_and_RETENTION_Methodology_FINAL.pdf.

EXCESS HOURS

In 2009, the Florida Legislature established an "Excess Credit Hour Surcharge" to encourage students to complete their baccalaureate degrees as quickly as possible. This law created an additional fee for each credit hour in excess of the total hours required for a degree. The Board of Governors' 2025 System Strategic Plan calls for 80% of all bachelor's degrees to be awarded without any excess hours. The Board included this metric as one of its university-specific metrics with the Performance Based Funding Model.

2013-14 Bachelor's Degrees Awarded Without Excess Hours¹

	FAMU	FAU	FGCU	FIU	FSU ²	NCF ³	UCF	UF	UNF	USF SYSTEM	USF TAMPA	USF ST. PETE	USF SAR-MA	UWF	SUS ²

TOTAL	35%	70%	73%	71%	n/a	19%	67%	80%	72%	66%	65%	69%	77%	67%	69%

Note: This fee cannot be waived by institutions, but the law provides for several exemptions to the Excess Hour fee, most notably that only transfer credits that are applied to the degree should be included in the calculation of the fee.

Note¹: The statutory provisions of the "Excess Hour Surcharge" have been modified several times by the Florida Legislature, resulting in a phased-in approach that has created three different cohorts of students with different requirements. The data above is based on the latest statutory requirements that mandate 110% of required hours as the threshold; however, this data does not attempt to report how many students have actually paid the surcharge at this time. For more details see: http://www.flbog.edu/about/budget/docs/performance_funding/PBF_Excess_Hours_Methodology_FINAL.pdf.

Note²: FSU has had delays in providing this data due to a significant change in their Enterprise Management System. The System data is preliminary until FSU provides this data. Note³: New College of Florida staff provide their own Excess Hour calculations because they do not report credit hours to the Board.

The table below provides a look at the distribution of baccalaureate graduates by how many credit hours they actually earned during their programs of study, which provides a more detailed picture of the graduating class than simply aggregating everyone above or below a threshold.

Percentage of 2013-14 Bachelor's Degrees by Credit Hours Earned

[Only for graduates of 120 credit hour programs]

STUDENT TYPE	NUMBER OF GRADUATES	WITHOUT EXCESS HOURS			WITH EXCESS HOURS		
		<120	120	120-132	132-140	140-150	150+
FTIC	16,660	32%	3%	27%	12%	11%	16%

Other Transfers	6,788	30%	4%	34%	12%	8%	12%
TOTAL	39,073	33%	4%	32%	11%	9%	11%

Note*: This table provides the total native hours and only the non-native hours (or, transfer hours) that are used toward the degree. This data uses the same exemptions (credits earned via dual enrollment, credit by exam, foreign language credits, internship credits, credit for life experience, credit for military training, and graduate rollover credit) that are used in calculating the excess hour metric, which is why students can have less than 120 credits.

Scholarship, Research and Innovation

Academic Program Quality

All institutions maintain regional accreditation through the Southern Association of Colleges and Schools. In addition, Board regulation (3.006) encourages institutions to seek national or specialized accreditation from professional organizations for its colleges, schools and academic programs for which there are established standards.

Specialized Accreditation

Eighty percent (80%) of State University System's academic programs for which specialized accreditation was available, received or maintained it during academic year 2013-14. Another 6% are in the planning stages of seeking such accreditation, which may take several years to achieve because of the considerable time and resources demanded of programs to indicate that quality assurance standards established by the accrediting body are adequately addressed. To supplement specialized accreditation reviews and ensure that programs without such accreditation receive sufficient attention, the Board requires the review of all academic degree programs at least every seven years.

Source: BOG staff analysis of 2014 State University System Accreditation Survey. Note: Programs suspended for new enrollments are included in these counts. Programs indicating a status of 'Not Seeking' or 'Not Renewing' cited resource constraints as a common reason for not seeking or renewing specialized accreditation.

Student Learning Outcomes Assessment

Academic Learning Compacts were established in 2004 to convey expected core student learning outcomes for each baccalaureate program in the State University System. These compacts identify what students are expected to know by the time they graduate and how that learning will be assessed. On an annual basis, programs also report whether the results yielded from the assessment process have been used to guide improvement. As of academic year 2013-14, nearly all of the undergraduate programs across the System have identified core student learning outcomes, adopted or developed assessment instruments, and used the results to guide improvement.

2013-14 ACADEMIC PROGRAM CHANGES

Pursuant to Section 1004.03(1) F.S., the Board of Governors is required to submit an annual report to the President of the Senate, the Speaker of the House of Representatives and the Governor listing new degree program reviews conducted within the preceding year and the results of each review. During the 2013-14 year, 42 new programs were approved and 23 were terminated. Another 23 programs were reviewed by the University, but not approved by a University Board of Trustees (UBOT). In addition, 56 programs are currently suspended for new enrollments.

PROFESSIONAL LICENSURE/CERTIFICATION EXAMS

Professional licensure and certification exam passage rates for graduates of State University System programs are useful indicators of program quality and effectiveness, albeit narrowly focused on a few disciplines. It is important to note that the ultimate pass rates, regardless of the number of attempts, are typically near 100%. In 2013-14, three-fourths (32 of 43) of university first-time pass rates were above the state and/or national averages, which also includes private institutions.

Note*: All benchmarks are based on national averages (from accredited US institutions), except the Law exam average is based on the Florida average (excludes non-Florida examinees). Note1: We have chosen to compute a three-year average pass rate for first-time examinees on the National Physical Therapy Examinations by exam year, rather than report the annual averages, because of the relatively small cohort sizes Note 2: Due to changes in accreditation policy, the National Board for Certification in Occupational Therapy (OTR) Examinations no longer report first-time pass rates. The pass rates are now 'New Graduates' pass rates and represent the ultimate pass rate, or the percentage of students who passed regardless of how many times the exam was taken.

RESEARCH, DEVELOPMENT, AND COMMERCIALIZATION

Through its research successes, the State University System plays a critical role in Florida's economy, helping it achieve a national and global reputation for innovation. The System provides a highly educated workforce for high-skill, high-wage jobs and companies; employs researchers who tackle some of the most significant challenges facing Florida, the nation, and the world; produces intellectual property that can be commercialized through licenses and patents; establishes partnerships with local and regional industries; promotes the creation of start-up and spin-off companies; and attracts new employers to Florida.

Patents and licenses are good indicators of the System's contributions to Florida's economic development and knowledge economy. The State University System is ranked number one in Florida for the number of patents awarded in the past five years by the United States Patent and Trademark Office. These data represent the initial movement from the laboratory to the marketplace.

UNIVERSITY CENTERS AND INSTITUTES

In fiscal year 2012-13, University Centers and Institutes accounted for \$575 million dollars in research activities – 86% of these expenditures were from non-state funding sources. These centers and institutes generated a \$5.94 return on investment for every dollar of State funds invested.

STATE UNIVERSITY SYSTEM CENTERS OF EXCELLENCE

Florida's investment in creating 11 Centers of Excellence is providing a substantial return on investment. Overall, the State has invested a total of \$78.4 million, and the Centers have returned \$523 million in competitive grant awards, private funds and licensing income - for a \$6.67 Return-on-Investment (ROI) for every state dollar invested. In addition, these Centers have created 896 jobs, and have established 962 collaborations with private industry. Detailed reports for each Center of Excellence are included in the university-specific sections of the Accountability Report.

Meeting Community Needs and Fulfilling Unique Institutional Responsibilities

The role of each university in achieving System goals is determined by that institution’s distinctive mission. The Board of Governors asked each institution to include in its annual report information regarding the unique aspects of its mission, as well as its responsibility for meeting specific community and regional needs.

Many of the individual university annual reports speak to the positive economic impact the institutions have on their regions. Public-private partnerships are referenced throughout the reports. Outreach in the PreK-12 schools represents a critical aspect of the System’s public service activity. The institutions play a major role in the cultural life of the communities in which they reside. The land-grant institutions offer critical assistance to Florida because of their cooperative extension programs. Students, faculty and staff provide thousands of hours in service to their communities, both through service-learning activities and through general volunteer activities. Many of the universities’ clinics provide services to members of their communities free of charge or at reduced costs.

The Carnegie Foundation for the Advancement of Teaching created an elective Classification for Community Engagement that focuses on the “collaboration between institutions of higher education and their larger communities (local, regional/state, national, global) for the mutually beneficial exchange of knowledge and resources in a context of partnership and reciprocity.”

■ COMMUNITY ENGAGEMENT CLASSIFICATION

Currently, seven campuses have achieved the Carnegie Foundation’s community engagement classification for *Curricular Engagement and Outreach and Partnerships*. The Board’s 2012-2025 Strategic Plans calls for all institutions in the System to achieve the Community Engagement Carnegie Classification.

Fiscal Summary

REVENUES

In 2013-14, the System has an overall budget of \$9.9 billion, divided into the following five major components. Education and General (E&G) state and tuition funds of \$3.74B are the primary sources of funding for instructional activities. Other funds support university operations in a manner restricted by the definition of the funding categories:

- **Contracts and Grants** (\$2.07B) are primarily federal grants restricted to the purpose of the grant.
- **Auxiliary Services** (\$1.29B) are ancillary self-supported units such as housing, transportation, food services, bookstores, parking services, and health centers.
- **Local Funds** (\$2.45B) are associated with student activity (supported by the student activity fee), and include student financial aid, concessions, intercollegiate athletics, technology fee, green fee, and student life & services fee.
- **Faculty Practice Plans** (\$383M) revenue is generated from patient services associated with health science center clinics.

Note*: Tuition data is based on budget authority and includes state funded financial aid programs. Note**: Carry-forward is funding from history year appropriations.

Voluntary Support for Higher Education [FY2013-14]

Charitable contributions to higher education have become even more important as declining state support has forced universities to look for alternative sources of revenue.
