Sightlines Update

- One year ago, the Facilities Committee strongly encouraged all universities (except NCF and FPU) to adopt the use of the Sightlines Facilities Benchmarking Service.
- All 10 universities have adopted Sightlines; their facilities data is loaded; and they are using the product at the campus level.
- At a system-level, we have gone from data-poor, to data-rich.
- We need the Committee's help, as we start to dig into this new mountain of data!
