STATE UNIVERSITY SYSTEM OF FLORIDA
BOARD OF GOVERNORS
Health Initiatives Committee
January 21, 2016

SUBJECT: Update on the Health Initiatives Strategic Plan

PROPOSED COMMITTEE ACTION

For Information

AUTHORITY FOR BOARD OF GOVERNORS ACTION

Article IX, Section 7, Florida Constitution

BACKGROUND INFORMATION

In August 2013 the Board of Governors Health Initiatives Committee was established to provide leadership for the development of system-level policy regarding health initiatives. The Committee has since concluded the first phase of its work by completing a year-long environmental scan encompassing health-related education, health care delivery impacted by the health care academic experience, and health-related research. During this second year of the two-year initiative, the Committee will identify State University System priorities in health care and develop a strategic plan.

Beginning its second year's work, the Health Initiatives Committee will review a draft Strategic Plan that includes goals, priorities, and strategies to meet the most pressing needs identified in the environmental scan. The Committee will receive an update on the Strategic Planning process that has included the identification of short-term and long-term priorities from the environmental scan and discussions with key constituency groups in each of the goal areas. Staff have discussed the environmental scan findings with constituency groups, such as the Deans of the SUS medical and nursing schools, the SUS Vice Presidents for Research, and a statewide Health Leadership Council. The Committee will provide direction on the goals and priorities in the draft and will meet with constituency groups at a February workshop to gather additional information on specific actions and estimated costs associated with the Strategic Plan strategies.
